

Global Environment Photograph Exhibition

Tokyo Big Sight supports the approach on the environment.

"Global Environment Photograph Exhibition" has been held organized by UNEP (United Nations Environment Programme) since November 1st, 2007 at North Concourse of Tokyo Big Sight. Global warming is a theme.

Measures for controlling global warming are important problems with which it should grapple as one of the corporate social responsibilities. Our company assumed that it undertook this photograph exhibition holding, set up a long-term exhibition space, supported and cooperated the activity of UNEP.

There are about 20 photographs, and it contains a good collection of an impressive work that catches the change in the global environment by Global warming. For example "Rupturing Glacier", Japanese and English explanation is put on each one of the works. As for this exhibition, it is scheduled to renew the photograph regularly, and to be held continuously. Please stop the foot by all means and see when you come.

Opening ceremony From the left:

Mr. Jun Miyauchi, chief director of Associates of the Earth,

Mr. Ikuzo Sakurai, vice minister of the Environment,

and Masaomi Koike, president of Tokyo Big Sight Inc.
